A unique radio app for your unique music

Sound Your Brand was born as a concept to carry the brand and its world in customers' and fans' pockets.

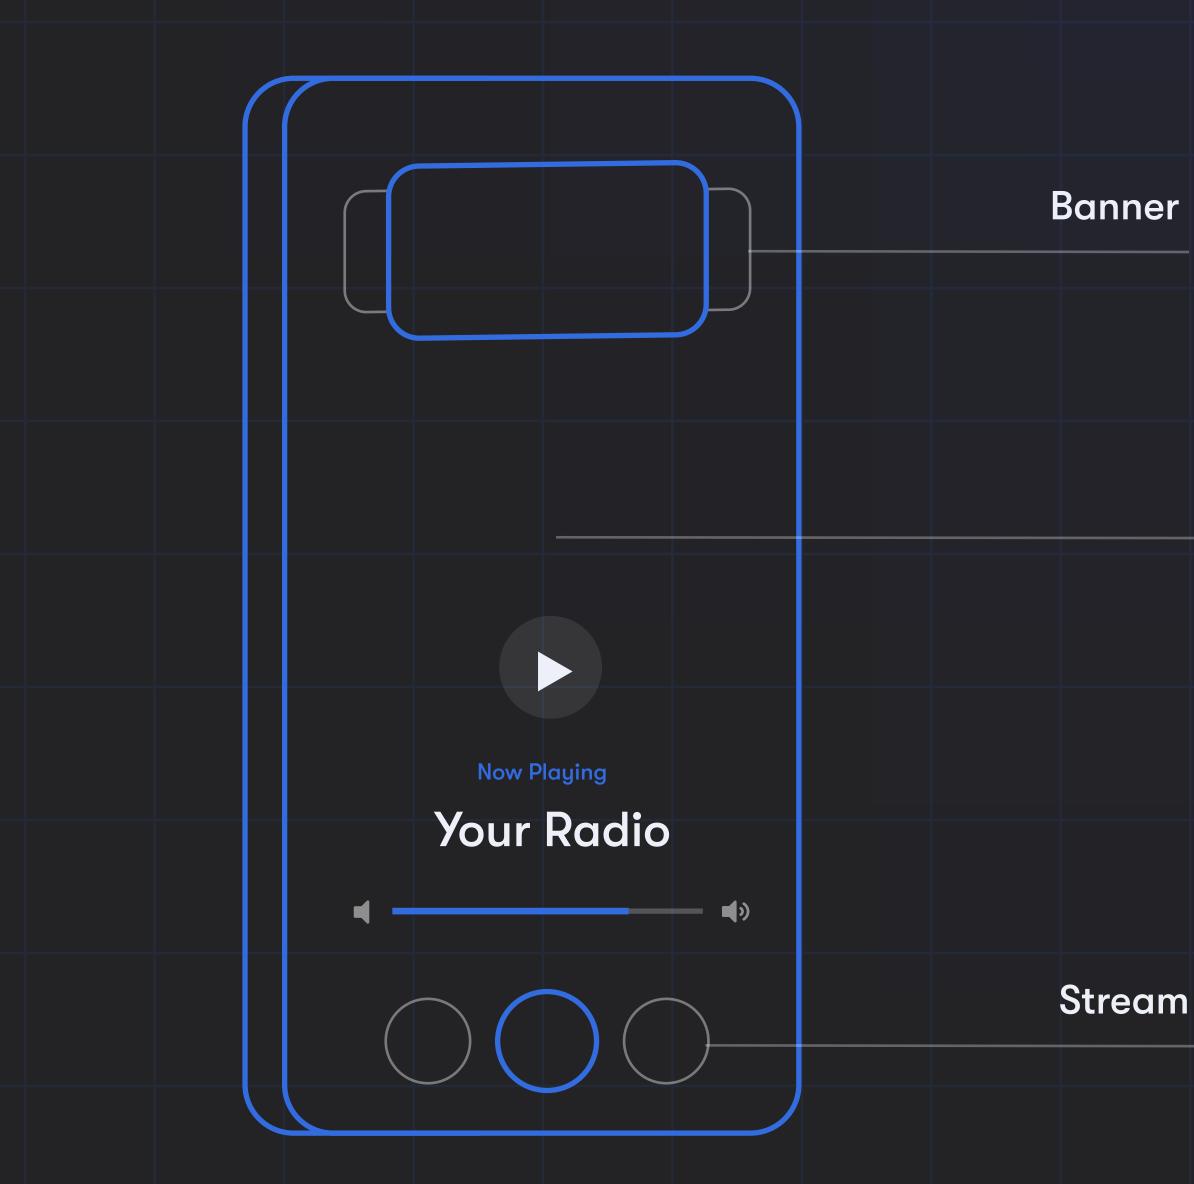

Musical moods and evocative images are spread through a native app, creating more powerful and lasting emotional anchors in his audience.

02 Structure

Flexible Content

You can create one or more Streams and associate multiple background images or banners to each of them.

Manage your schedule in a simple and intuitive way

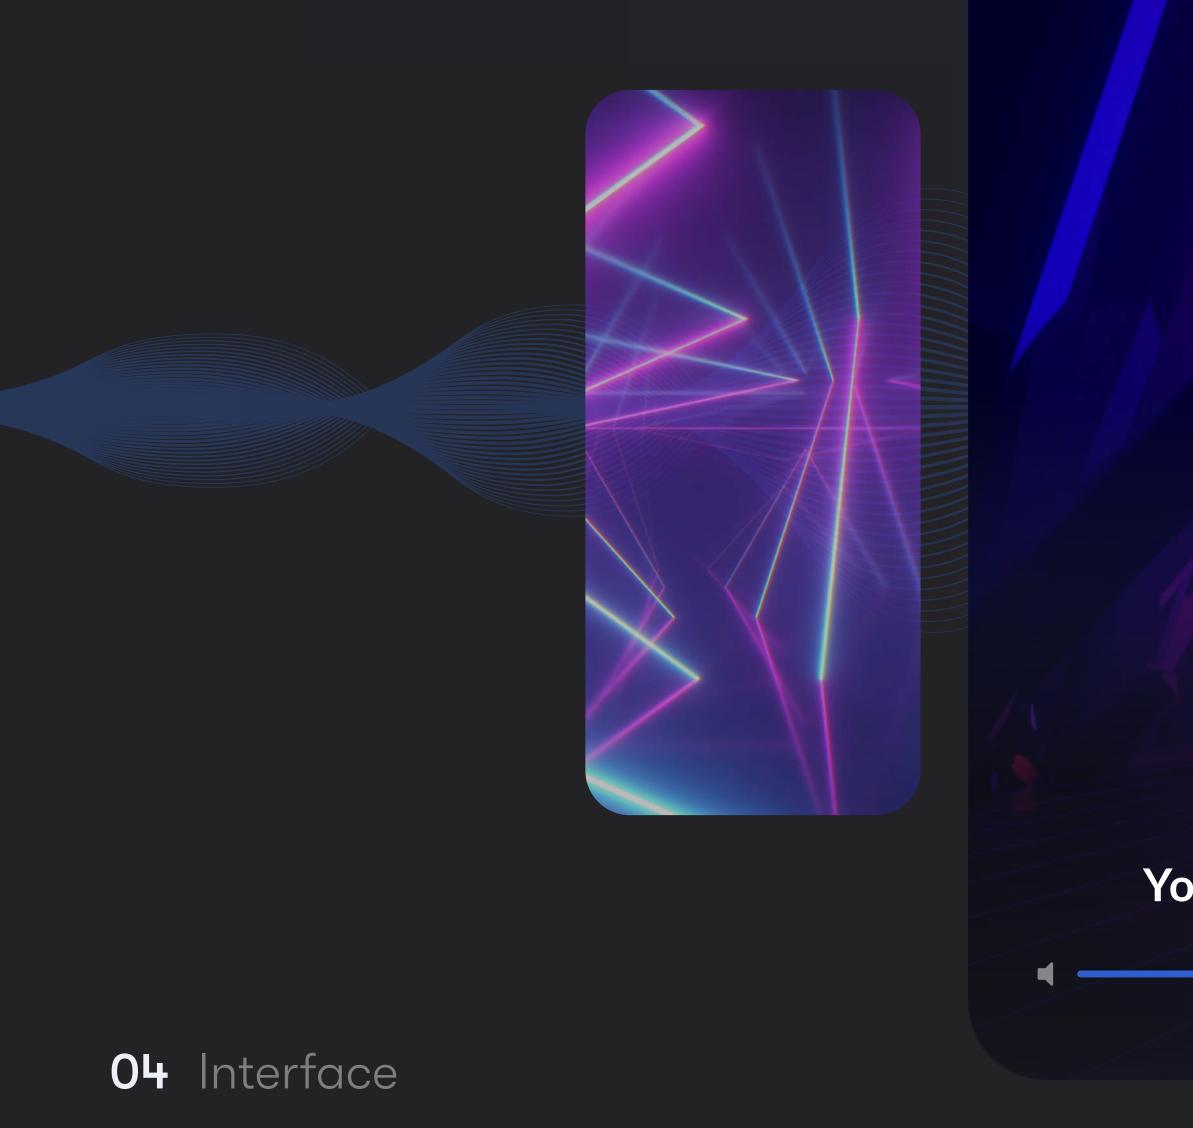

The management of the schedule and all the content takes place independently through a Google Sheet, which also allows the updating and dissemination of the schedule by simply sharing a link.
