

Create & Share dynamic Contents

From a simple page with a list of buttons for your Link in Bio to a web page with videos, images, countdowns and anything else you need to make yourself known or to promote your events.

YOU CAN CREATE A

Page with a List of Links

Collect your most significant links on one page. Use custom buttons or add links to your social media, Email, WhatsApp and Telegram.

YOU CAN CREATE A

Vertical Page

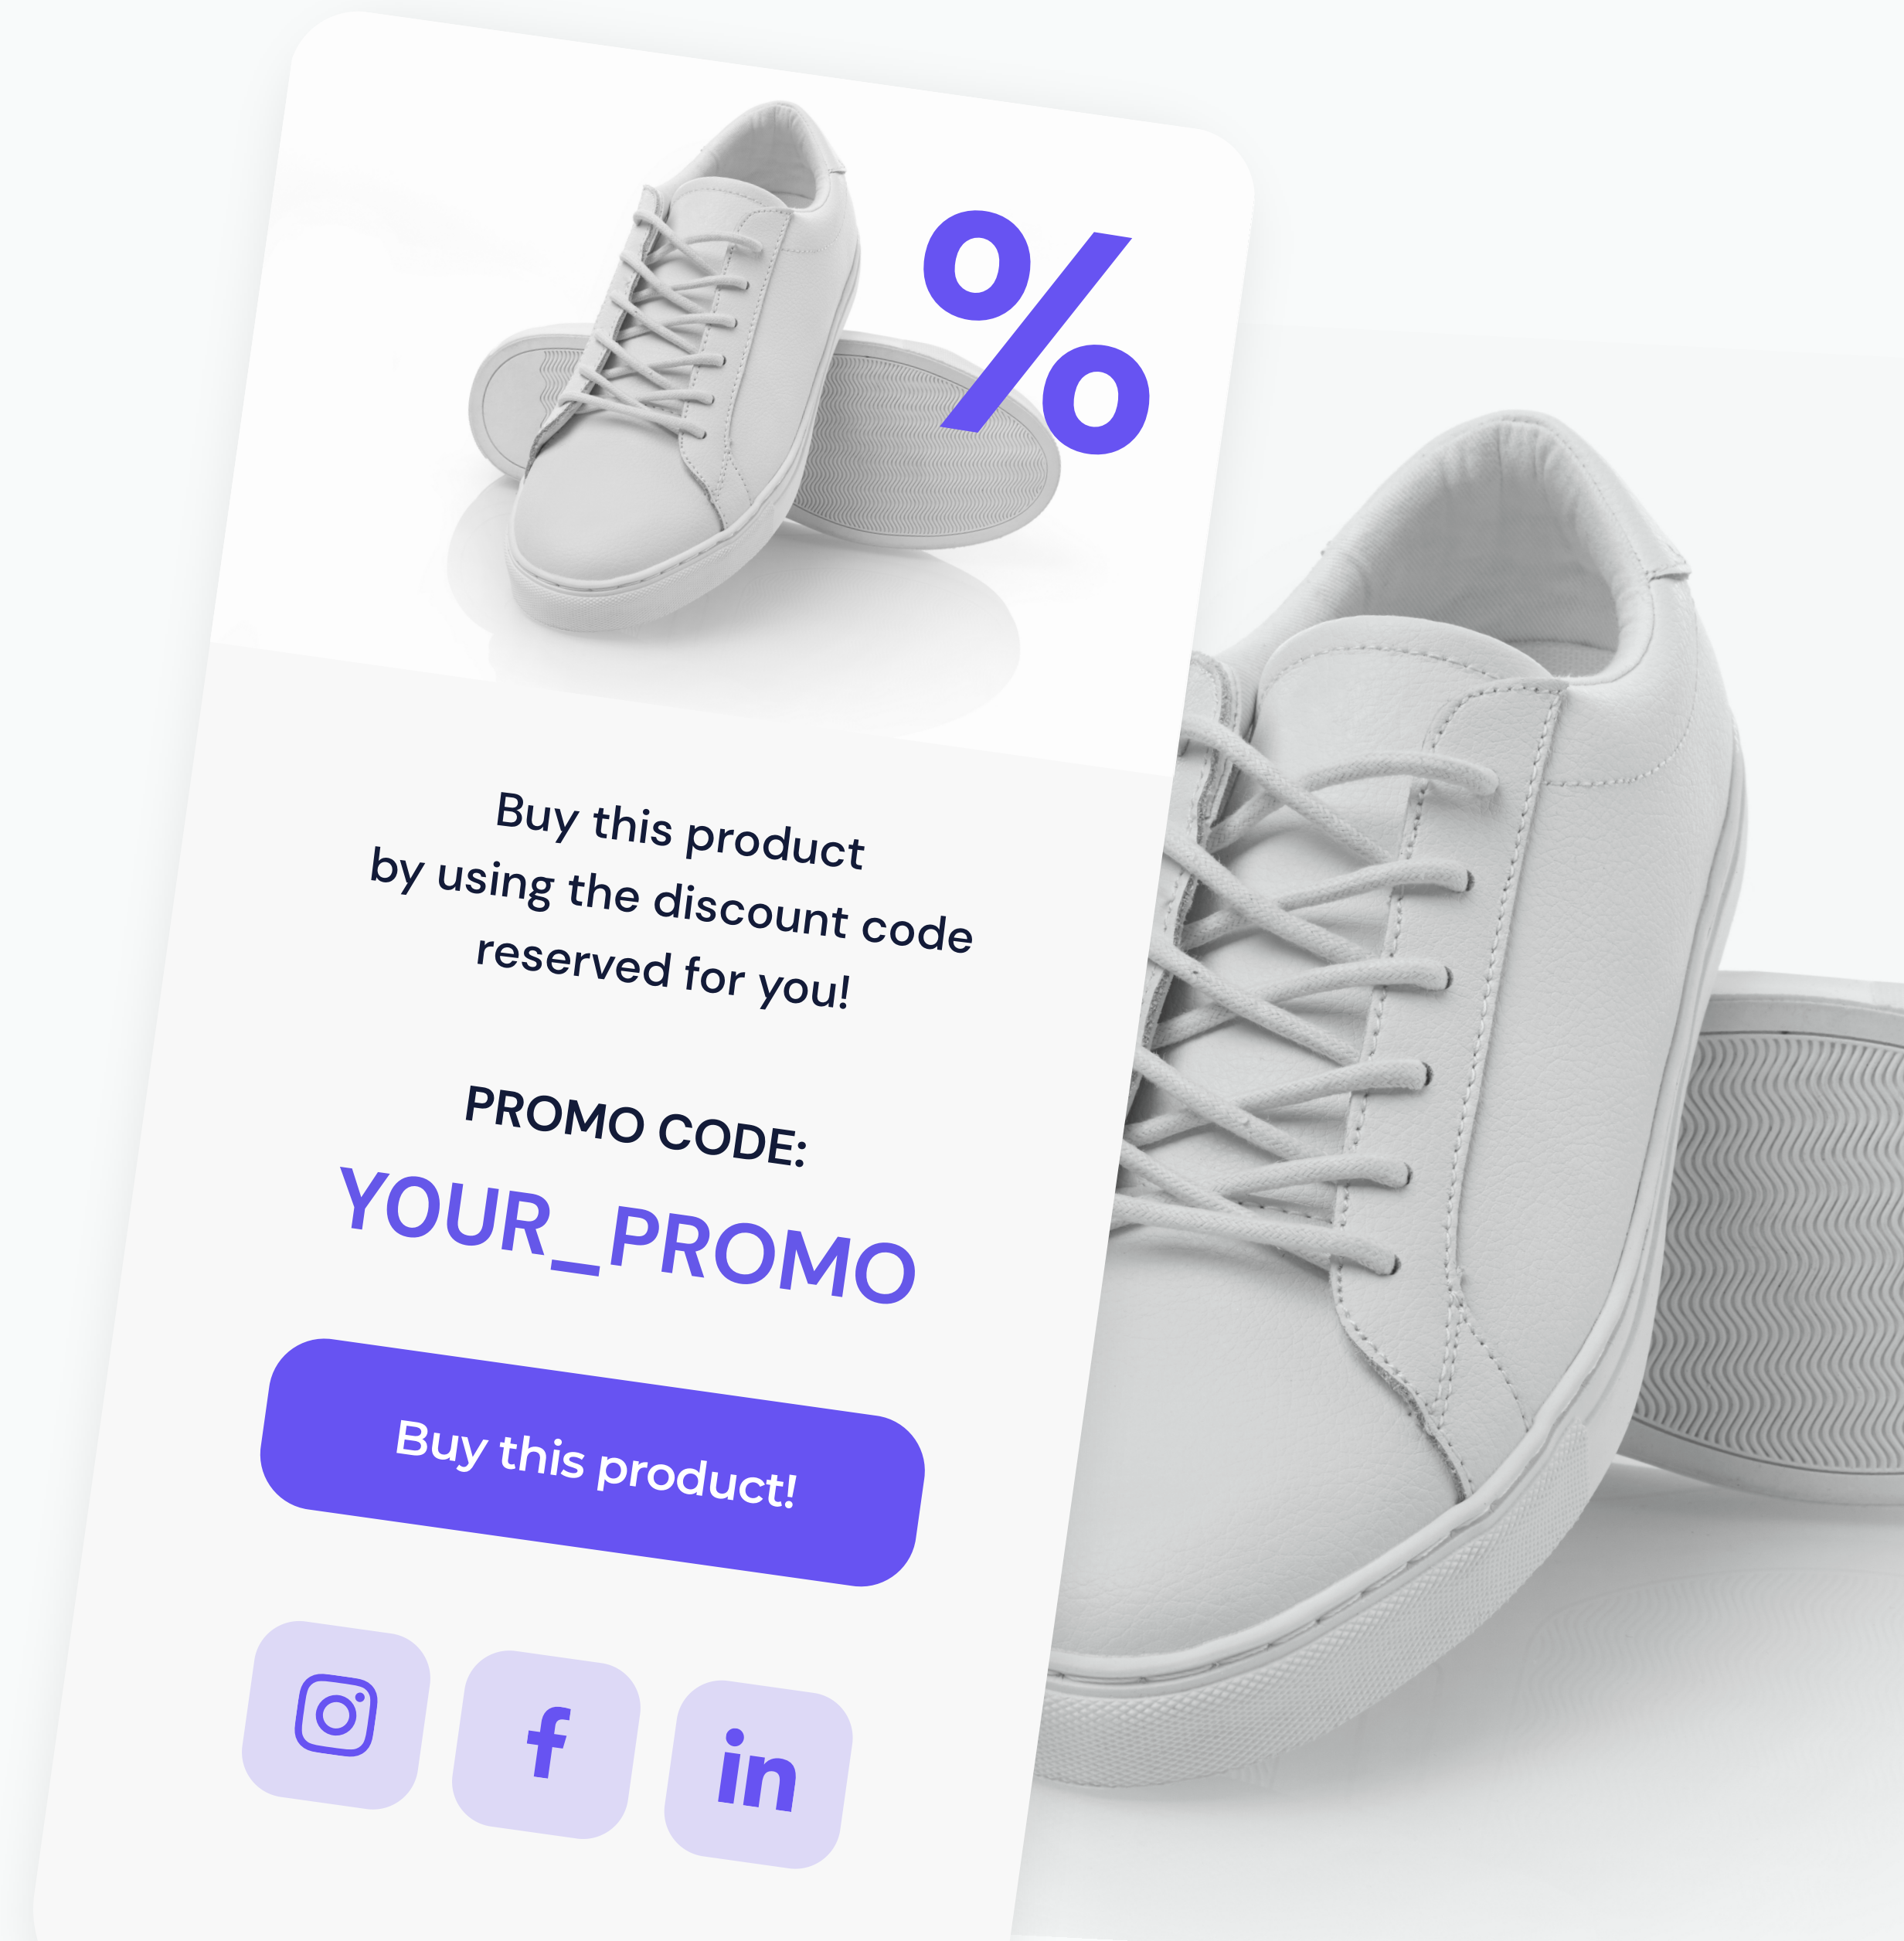

Build a web page at lightning speed with the Touch My Link builder. Insert text, images, videos, custom buttons and social buttons. Add a countdown or push yourself with HTML blocks to insert external elements (E.g. a form from Mailchimp).

YOU CAN CREATE A

Promotional Page

Use our vertical page as a digital flyer for your advertisements. You will be able to add discount codes or a link to your contact/registration forms.

Schedule your contents a let them switch on their own.

Thanks to content scheduling, You can focus on other things while everything goes according to your plan. No new links to reshare, the contents are dynamic and you can always edit them or add new ones.

Connect physical and digital

Share your link using one of the following options:

QR Code

For each Link, our tool will generate a QR-Code to be shared online or to be printed on stickers, cards or wherever you want.

NFC Tag

Why not use NFC technology to share your Links? Directly from TouchMyLink you will be able to easily write your NFC Tags.
